In loving memory of our brother Hugh

What does it mean to be a sibling...

A sibling is a built-in friend, a family member you are connected with by blood, but choose to keep close with your heart

Siblings are the companions you grow up with, sharing countless memories, inside jokes and family traditions

They are your partners in crime during family gatherings, the confidant in secret conversations and the constant in this ever-changing landscape of life

Siblings are the ones who understand the quirks of your family dynamics because they have lived them too

They make the journey from childhood to adulthood much more adventurous, much more memorable, and a lot more fun

Siblings are the ones that time and distance cannot break the bond that ties you together

Siblings are the unique blend of family and friendship, offering a special bond, that spans between both worlds and keeps you forever connected

Your sibling is someone you would not have wanted to travel on this road of life, without them by your side

Rest in peace Hugh and know you will always be loved and will always be missed
